

CL Series Water Treatment

The CL Series of water conditioners is the solution for all types of homes. Premium softening and filtering media combined with a high flow valve provides quality water with virtually no pressure loss.

Your factory authorized CL dealer will help you size, select and install the correct product for your needs.

CL Series

Why do we need soft water?

Water containing minerals such as calcium and magnesium react adversely with soap thus leaving a soap scum on shower doors, walls and bathtubs.

With a CL Softener you will:

- Increase your water heater efficiency by as much as 30%, reducing fuel costs
- Add years to water-using appliances such as dishwashers, kettles and washing machines
- Reduce your laundry detergent, soap, and dishwashing detergent by as much as 50%, saving you money
- Reduce soap scum and residue on tubs, toilets, showers and sinks
- Have softer skin after showering and bathing

Choose a CL Series Softener that's right for you!

Accessories

CL Series WSI Softener

CL Series WSICS Softener

CL Series WSITC Softener

Why do we need treated water?

The CL range of filters can help eliminate problems such as iron, manganese, sulphur, turbidity and unpleasant tastes and odours.

The CL Series of filters are designed to help eliminate the water contaminants to provide clean, clear and fresh water for every day use.

Your professional CL Dealer will help you size, select and install the correct filter for your needs

Does your water have unpleasant taste?

The CL Series carbon filters will adsorb these unpleasant tastes and leave you with clean, great tasting water.

Some municipalities are adding chloramines to the water supply which are harmful to aquariums and irritating to sensitive skin. The Centaur CL Series Carbon Filter will effectively reduce the chloramines from your water supply.

Why invest in a CL Series Conditioner?

- Full manufacturers guarantee
- State of the art microprocessor
- Fully programmable control to meet your families water needs
- Backed by quality Water Treatment Professionals
